WORK EXPERIENCE

🏢 *Freelancer* – Kosovo

Software developer

[01/2024 – Current]

I design and build full-stack web applications using different technologies depending on the project requirements. My work includes analyzing software requirements, creating functional prototypes, and implementing scalable and efficient solutions. I focus on writing clean and maintainable code while following modern software development practices. I also handle debugging and testing to ensure good performance, stability, and a smooth user experience. Overall, my goal is to deliver high-quality software that meets user needs and supports the project's goals.

Technologies & tools: HTML, CSS (TailwindCSS), JavaScript, jQuery, Angular, PHP (Laravel), Shopware 6, C#, MySQL, REST APIs, Git/GitHub

🏢 *On contract* – United States

WORDPRESS DEVELOPER

[06/2025 – Current]

Developed a custom WordPress website based on an existing Squarespace design, with added functionality beyond the original site. Built a custom gallery item input system and a keyword-based search feature to retrieve items by assigned keywords. Integrated client-provided designs and ensured a clean, responsive implementation. I am currently maintaining the website and developing new features as needed.

https://buynownames.com/
Tech: WordPress, PHP, CPT, ACF, JavaScript, HTML, CSS

🏢 *Gao Rfid Inc.* – New York, United States

WORDPRESS DEVELOPER

[06/2024 – 07/2025]

Customized and developed WordPress websites based on client needs, using plugins like Contact Form 7, Elementor, WooCommerce, and others. I worked on creating custom themes, improving performance, and building custom plugins when the project required additional functionality. I also used PHP, HTML, CSS, and JavaScript to extend features beyond default WordPress capabilities. During development, I managed content, fixed various bugs and compatibility issues, and made sure the final product was optimized, stable, and user-friendly.

Technologies & tools used: WordPress, PHP, JavaScript, HTML, CSS, WooCommerce, Contact Form 7, Elementor, Custom Themes & Plugins, cPanel, Git

🏢 *Spaxel* – Prishtina, Kosovo

FULL STACK DEVELOPER

[03/2023 – 12/2023]

I initially joined on a 3-month internship, after which I continued as a Junior Developer. My responsibilities included developing and modifying apps based on user needs and standards, debugging, and testing software for functionality and user experience. I created prototypes, solved technical challenges, and wrote tests. I collaborated with engineers and business teams to track progress and resolve issues, while improving my coding, presentation, and communication skills in a fast-paced environment. Additional tasks were completed as assigned by the supervisor. The main project involved developing a terminal-based application used in real estate business operations, including property intake, valuation, contract workflows, and client management.

Technologies used: C#, .NET, Angular, TypeScript, JavaScript, HTML, CSS, Git / GitHub, REST APIs

🏢 *BOOK WORMS DEVS - NGO* – Lipjan, Kosovo

FULL STACK DEVELOPER

[09/2020 – 09/2021]

Developed a web-based system to manage the library's book inventory, member registrations, and borrowing records. Implemented user-friendly interfaces for both staff and members. Improved library efficiency by enabling digital book tracking, search functionality, and report generation.
